Lab 2 - Responsive Navbar and Grid Drill

Lectures 7-10 | Bootstrap 5

Goal

Build a simple responsive navigation bar and product grid using Bootstrap. The page has eight placeholder products and uses a CSS-only hamburger menu, so no JavaScript is needed.

Requirements shown

- Logo left, navigation links centered, cart right on desktop.
- Hamburger navigation below 768px using a checkbox and CSS.
- Product grid: one column on phones, two on tablets, four on desktop.
- Add to Cart buttons are placeholders and do not perform an action.

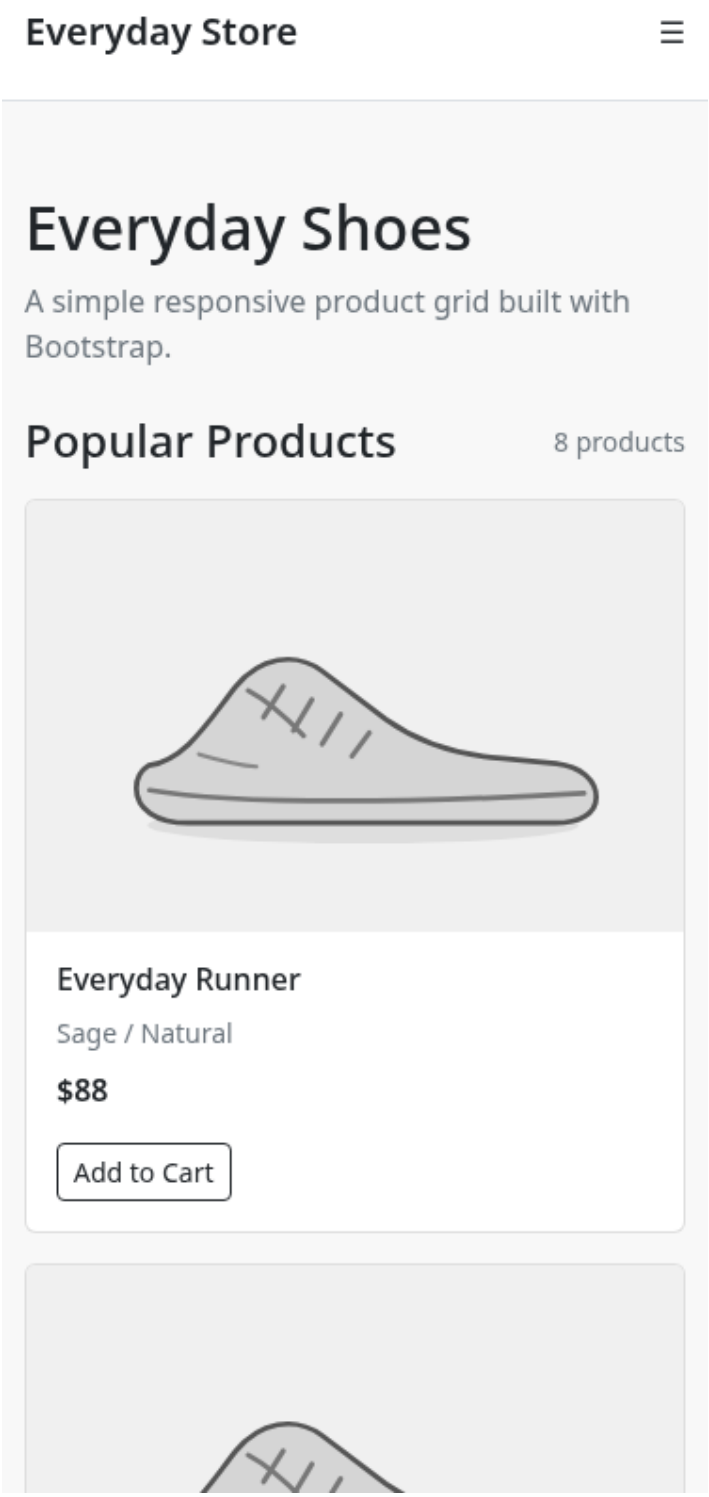

Tested viewport widths

Phone: 375px | Tablet: 768px | Desktop: 1440px

Screenshots on the following pages were captured from the included page preview at each viewport size.

Phone layout

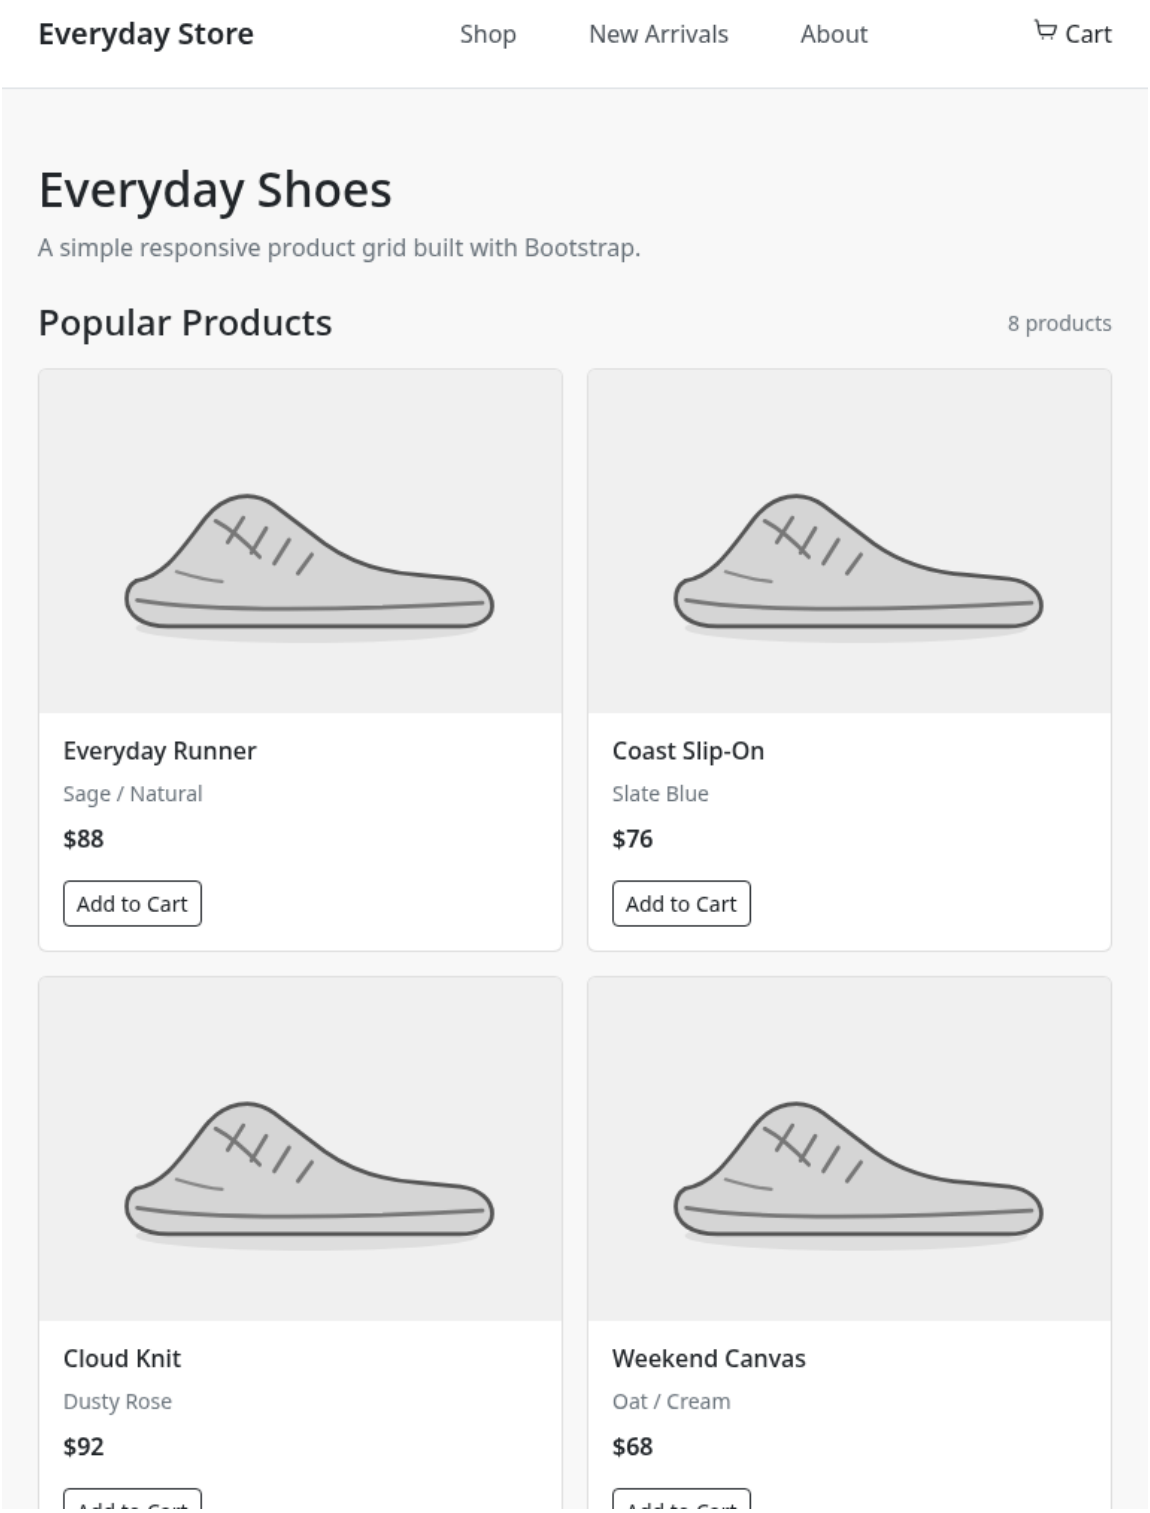

Viewport: 375 x 812 px **Grid:** 1 column

On narrow screens, the menu is collapsed behind the hamburger toggle.

Tablet layout

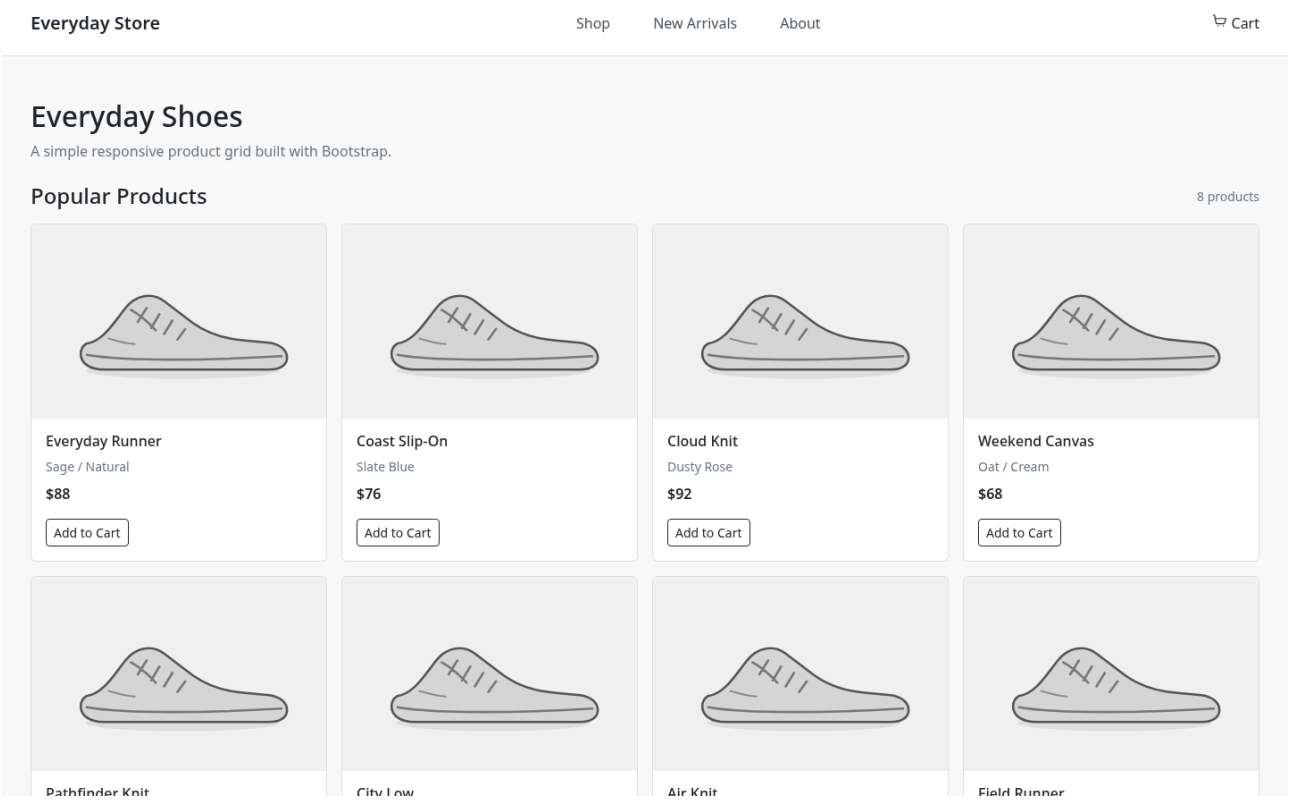

Viewport: 768 x 1024 px **Grid:** 2 columns

At 768px, the desktop navigation is visible and the grid has two columns.

Desktop layout

Viewport: 1440 x 900 px **Grid:** 4 columns

The logo, centered navigation links, and cart share one row; the product grid has four columns.
